Optimism Fractal Intent

Optimism Fractal is a community dedicated to fostering collaboration and awarding public good creators on Optimism.

1. Community Meetings

1.1. Consensus meetings happen every week;

1.2. At the start of the meeting participants are randomly distributed into break-out groups of 3 to 6 people. Each break-out group plays
<u>Respect game</u>, which lasts for 45 minutes;

2. Respect Game

2.1. Each participant of the group is given up to 4 minutes to present their contributions. Their presentation should answer the following question: "What did I do this week to help Optimism?"

2.2. After everyone has had time to present, the group tries to reach consensus on rankings of contributions;

    2.2.1. The participant who has contributed the most gets Level 6, the second biggest contributor gets level 5 and so on;

2.3. Once the group reaches consensus, participants of the group signal it onchain by calling
`submitCons` function of the smart contract;

3. Validity of break-out group result

3.1. Break-out group result consists of rankings produced by the Respect Game and a group number;

3.2. A break-out group result is said to be valid if all of the following requirements hold

    3.2.1. At least 2/3rds of the break-out group participants submit this result onchain by calling `submitCons` contract function within 2 hours of Respect game start. If a participant submits two conflicting results within this 2-hour window, only the newer one is taken into account;

    3.2.2. At least 1 council member calls `submitCons` signaling this result (they don't have to be participant of a break-out group);

    3.2.3. A break-out group result is not blacklisted by the council (by passing a proposal to do it - see item 6);

4. Respect

4.1. Respect is a non-transferable token representing respect (an opinion) that a community (in this case OP fractal) has on a particular account;

4.2. Respect is not a property that can be owned by anything (or anyone) other than OP fractal as a whole. No member of OP fractal owns any part of Respect distribution.

5. Respect Distribution

5.1. Every consensus meeting shall eventually result in minting of Respect to participants of valid break-out groups;

5.2. Level 6 of a valid break-out group receives 55 Respect;

5.3. Level 5 of a valid break-out group receives 34 Respect;

5.4. Level 4 of a valid break-out group receives 21 Respect;

5.5. Level 3 of a valid break-out group receives 13 Respect;

5.6. Level 2 of a valid break-out group receives 8 Respect;

5.7. Level 1 of a valid break-out group receives 5 Respect;

6. Consensus process

6.1. Top 6 Respect earners over the last 12 meetings constitute a "council" (except during a Bootstrap stage);

6.2. A proposal is said to be passed by OP fractal if at least 2/3rds of council members signal approval for it;

6.3. Besides signaling consensus opinion of OP fractal, proposals can make changes to rules that govern OP fractal (i.e.: rules expressed here), blacklist break-out group results (see 3.2.3) or any accounts and make changes to the current Respect distribution (burn existing or mint additional Respect);

7. Bootstrap stage

7.1. During the first 12 weeks of OP fractal the council will be constituted by 4 accounts controlled by 4 people who launched OP fractal:

1. 0xf6E9B8d1877Ea00F7b72F682Fa15906D6A9F4693

2. 0xC11C6f47fe090a706bA82964B8A98F1682b244Ff

3. 0xAED620c450911c38714E666cd84137767e3D6286

4. 0xF34F5B88Ff9A65594C49ed9Fa8D0451C15Ce215B
